

MATHEMATICS, SCIENCE AND IT ACADEMY

SEMESTER 1 2019

Course Title	Physics <i>Integrating Australian Curriculum</i>	Course Code	1400
Semester Unit	Unit 3: Gravity and Electromagnetism	Unit Code, Value	23214, 1.0
Term 1 Unit	Unit 3a: Gravity and Electromagnetism	Unit Code, Value	23215, 0.5
Term 2 Unit	Unit 3b: Gravity and Electromagnetism	Unit Code, Value	23216, 0.5

GOALS

The specific goals of this unit are for students to:

- understand that motion in gravitational, electric and magnetic fields can be explained using Newton's Laws of Motion
- understand how the electromagnetic wave model explains the production and propagation of electromagnetic waves across the electromagnetic spectrum
- understand transformations and transfer of energy in electromagnetic devices, as well as transformations and transfer of energy associated with motion in electric, magnetic and gravitational fields
- understand how models and theories have developed over time, and the ways in which physical science knowledge and associated technologies interact with social, economic, cultural and ethical considerations
- use science inquiry skills to design, conduct, analyse and evaluate investigations into uniform circular motion, projectile motion, satellite motion and gravitational and electromagnetic phenomena, and to communicate methods and findings
- use algebraic and graphical representations to calculate, analyse and predict measurable quantities related to motion, gravitational effects and electromagnetic phenomena
- evaluate, with reference to evidence, claims about motion, gravity and electromagnetic phenomena and associated technologies, and justify evaluations
- communicate physics understanding using qualitative and quantitative representations in appropriate modes and genres.

CONTENT SUMMARY

Further elaboration on the content of this unit is available at:

<http://www.australiancurriculum.edu.au/seniorsecondary/science/physics/curriculum/seniorsecondary#page=3>

COST OF MATERIALS

There are no costs associated with this unit of study.

ASSESSMENT

TASK	DUE DATE	WEIGHTING
Practical Assignment	Week 5	20%
Test 1	Week 9	30%
Research Assignment	Week 15	20%
Test 2	Test week	30%

Specific Entry & Exit Requirements for Term Units

It is possible to enter this course at Term 2. Entry into this course for Term 2 is by negotiation with the Executive teacher.

To exit at Term 1 you must complete the Practical Assignment and Scientific Investigation.

ASSESSMENT CRITERIA FOR ASSESSMENT AND REPORTING OF STUDENT ACHIEVEMENT

Students will be assessed on the degree to which they demonstrate:

- knowledge and understanding
- critical thinking
- investigative skills
- communication skills
- effective work practices.

Science Unit Grade Descriptors for T courses

	A student who achieves an A grade typically	A student who achieves a B grade typically	A student who achieves a C grade typically	A student who achieves a D grade typically	A student who achieves an E grade typically
Knowledge and Understanding	<ul style="list-style-type: none"> demonstrates thorough and extensive knowledge and understanding of scientific concepts justifies and applies knowledge to familiar and unfamiliar contexts and across different concept areas and experiences, displays originality and lateral thinking in problem solving 	<ul style="list-style-type: none"> demonstrates broad and in-depth knowledge and understanding of scientific concepts applies knowledge to familiar and unfamiliar contexts and across different concept areas and experiences, displaying originality and effective thinking in problem solving 	<ul style="list-style-type: none"> demonstrates broad and general knowledge and understanding of scientific concepts is able to apply knowledge in a variety of contexts and different concept areas to solve problems 	<ul style="list-style-type: none"> demonstrates general and basic knowledge and understanding of scientific concepts is able to use knowledge in different areas to solve problems 	<ul style="list-style-type: none"> demonstrates a limited knowledge of scientific concepts displays emerging awareness of strategies to solve problems
Critical Thinking	<ul style="list-style-type: none"> evaluates, synthesises and analyses patterns and trends in data, observations and investigations and makes valid and perceptive inferences applies highly effective analytical and evaluative skills, makes perceptive connections between scientific concepts, draws accurate conclusions and proposes appropriate improvements 	<ul style="list-style-type: none"> analyses and synthesises patterns and trends in data, observations and investigations and makes valid inferences applies effective analytical skills, makes insightful connections between scientific concepts, draws mostly accurate conclusions and proposes appropriate improvements 	<ul style="list-style-type: none"> describes and explains patterns and trends in data, observations and investigations and makes general inferences describes and explains general connections between scientific concepts, draws conclusions and proposes improvements 	<ul style="list-style-type: none"> identifies and describes patterns in data, observations and investigations and makes simple inferences describes connections between scientific concepts, draws conclusions and proposes improvements 	<ul style="list-style-type: none"> identifies patterns in data, observations and investigations identifies connections between scientific concepts
Investigative Skills	<ul style="list-style-type: none"> demonstrates logical and coherent investigations, acknowledges information using referencing conventions and operates equipment highly effectively and safely 	<ul style="list-style-type: none"> demonstrates well considered investigations, acknowledges information using referencing conventions and operates equipment effectively and safely 	<ul style="list-style-type: none"> demonstrates considered investigations, acknowledges information using referencing conventions and operates equipment safely with some general effectiveness 	<ul style="list-style-type: none"> outlines investigations, inconsistently acknowledges information using referencing conventions and mostly operates equipment effectively and safely 	<ul style="list-style-type: none"> displays emerging skills in investigations, attempts to acknowledge information and operates equipment with limited awareness of safety procedures
Communication	<ul style="list-style-type: none"> presents highly complex concepts accurately and coherently in a wide range of written and non written formats using appropriate terminology with flair 	<ul style="list-style-type: none"> presents concepts clearly and logically in a range of written and non written formats using appropriate terminology with confidence 	<ul style="list-style-type: none"> presents general concepts clearly in a range of written and non written formats using appropriate terminology generally using terminology appropriately 	<ul style="list-style-type: none"> presents basic concepts in a narrow range of written and non written formats using terminology inconsistently 	<ul style="list-style-type: none"> presents some basic concepts in a limited range of written & non written formats using minimal terminology
Work practices	<ul style="list-style-type: none"> organises time and resources to work in a highly productive and safe manner both independently and in a team evaluates and analyses risks, acts highly appropriately in all investigations 	<ul style="list-style-type: none"> organises time and resources to work in a productive and safe manner both independently and in a team analyses and explains risks and acts appropriately in all investigations 	<ul style="list-style-type: none"> organises time and resources to work in a generally productive and safe manner both independently and in a team identifies and describes risks and acts appropriately in all investigations 	<ul style="list-style-type: none"> demonstrates inconsistent organisation of time & resources, works with occasional productivity & some awareness of safety independently or in a group identifies risks and acts mostly appropriately in investigations 	<ul style="list-style-type: none"> demonstrates limited organisation of time & resources to work with an emerging awareness of safety demonstrates an emerging awareness of risks, developing approaches to investigations

Teachers will consider, when allocating grades, the degree to which students demonstrate their ability to complete and submit tasks within a specified time frame.

ATTENDANCE AND PARTICIPATION

Students are expected to submit all assessment items and attend all classes, participate in a positive manner and seek support whenever it is required. Excursions, simulations and presentations by visitors (including lunchtime) may form part of classwork. It is your responsibility to catch up on missed work when absent from class.

Any student whose attendance falls below the 90% of the scheduled classes/contact time and has not provided substantial documentary evidence to cover the absence will be awarded a V grade. This means that 4 unexplained absences in a term or 8 unexplained absences in a semester could mean that a V grade may be awarded. However, the Principal has the right to exercise discretion in special circumstances if satisfactory documentation is supplied.

LATE SUBMISSION OF WORK

Students are encouraged to submit work on time, as it is a valuable organisational skill. Students are also encouraged to complete work even if it is late, as there are educational benefits in doing so.

Late work will receive a penalty of 5% (of possible marks) per calendar day late, unless an extension is granted by the class teacher prior to the deadline. This means that 5% is taken off the possible marks that could have been achieved eg. If a student achieved a score of 75/100, and the item is one day late, then five marks (5% of 100) would be taken from 75, which leaves the score as 70/100. 'Per calendar day late' means each day late whether it be a weekend or public holiday. Items due on any date must be submitted to the class teacher, faculty staff room, or front office at the college by 3.30pm on that day. After 3.30pm, the item will attract the late penalty. Submission of work on a weekend or public holiday is not acceptable. If you do not submit your work to your class teacher, make sure that it is signed and dated by either another member of staff in the faculty staffroom, or a member of the front office staff.

Achievement in Accredited Courses is reported to the Board of Senior Secondary Studies and students with a Grade A-E. Late work submitted without approval will have an impact on the grade awarded to a student.

No work will be accepted after marked work has been returned, or accepted after the unit has completed. Computer and/or printer failure will not be accepted as a valid reason for late work. Make sure you backup, keep hard copies and rough notes.

Unless prior approval is granted, any student who fails to submit assessment tasks worth in total 70% or more of the assessment for the unit, will be considered to be unassessable and will receive a V grade. The Principal has the right to exercise discretion in the application of the late penalty in special circumstances where satisfactory documentation is supplied.

CHEATING AND DISHONEST PRACTICE

The integrity of the College's assessment system relies upon all involved acting in accordance with the highest standards of honesty and fairness. Any departure from such standards will be viewed very seriously."

Accordingly:

- Plagiarism - claiming authorship of someone else's work (intentionally or otherwise) - is a serious misdemeanour, and attracts severe penalties.
- Students are required to acknowledge the source of all material that is incorporated into their own work.
- Students may not submit the same item for assessment in more than one unit, unless specific agreement has been reached with the class teacher.

MODERATION

Throughout the semester, moderation in the form of common marking schemes, cross marking and joint marking occurs across all units in the Moderation Group to ensure comparability of standards. Moderation is a process whereby student's work is compared so that student performance can be graded fairly and consistently. Moderation takes some time, and so students may not receive their work back until ACT wide moderation of grades across all colleges has occurred. Small Group Moderation is carried out in courses with small class sizes.

RIGHT TO APPEAL

You can appeal against your assessment if you feel that the result you obtained is not fair. You should first talk to your class teacher, and if you are not satisfied with the explanation you must discuss the situation with the Executive Teacher of the faculty concerned. If you still do not feel that your result is fair you should talk to the Deputy Principal Programs for further advice on the 'appeal process'.

Executive Teacher: Ruth Edge

Class Teacher: James Hall

Date: February, 2019
